

Commissioning checklist

This checklist highlights the tasks required before a participant can go live. This is broken into 3 sections:

- Documentation
- Interface testing
- Customer Portal set up

Documentation

The follow documents are needed:

Signed Contract	
Participation Requirements Form	
Billing details form submitted	

Interface Testing

API test

At a minimum the customer will be expected to operate the following test on the self-test environment.

Self testing in UAT environment

Provision of reliable metering	
Reliable provision of emergency stop signal	
Receive a start signals reliably	
Receive a stop signals reliably	

For the full API test a Flexible Power representative will be present online to validate the

Metering sent from a real site(s)	
Confirm ability to Receive a start signal	
Send an emergency stop signal for the service.	
Confirm ability to Receive a stop signal	

IMPORTANT NOTE;

Once a participant has completed the initial set up and testing within the UAT environment they will be provided with a log in to the full production environment. This will require the participant to modify the API to reflect the 'end point' so that they are able to receive the signals to their chosen device and send metering signals / emergency stop to Flexible Power's live environment.

Customer Portal set up

To set up the customer portal, participants need to :

Login	
Update Password	
Provide details of sites within activated constraint zone(s)	
Update initial availability per zone
